

A helicopter is shown in flight over a deep, rugged canyon. The canyon walls are steep and rocky, with patches of green vegetation. A river flows through the bottom of the canyon, and a large waterfall cascades over the edge of the canyon on the right side. The helicopter is positioned on the left side of the frame, flying towards the right.

FLIGHT DURATION: 40 MINUTES

Let us take you on an unforgettable helicopter adventure. It begins with an exciting lift off from a remote beach on Swift Bay in the remote North Kimberley coast.

Experience the spectacular coastline of the Montague Sound as we fly over its beautiful beaches and hills on course to the Lower Mitchell Falls. Marvel at the Livistona palms clinging to the red rock faces of islands, hills and gorges as we fly inland. You may spot wild cattle in the valleys. Enjoy the broad vistas of the Mitchell Plateau before orbiting and landing above the three tiered Mitchell Falls (Punamii-unpuu).

There is the option to land and admire the Falls from the ground and returning an hour later, or to continue without landing on the return flight, which takes in JCR Creek and provides stunning views from the opposite side of the helicopter as you fly back to Swift Bay.
